Company X Data Department Report

Executive summary:

We exported the sales data from our data base and we conducted some analysis on it to gain insights into some of our sales operations and study ways of enhancing our services based on a certain scope.

Scope:

- customer loyalty
- strength and weak points
- Performance
- Customer Experience

Data Specs:

Here are the tables we used to conduct our analysis.

- Order Table
- Return Table
- Shipping Cost

The Analysis

customer loyalty

- What is The Most Used ship mode by our customers?

Row Labels	Count of Ship Mode
First Class	1
Same Day	4
Second Class	5
Standard Class	27
Grand Total	**37**

Based on the table above we counted the numbers of times each shipping mode occurred in the orders table.

And found that Standard Class Shipping Mode was the most one used by Our Customers by 72.97%.

Recommendations:

- We should focus more promotions on the standard shipping mode as it is the most used.
- We should find ways to reduce the cost of standard shipping mode and it's profitable as is the most used shipping mode.
- First Class Shipping mode was the least used shipping mode which might be better to revise the cost and the possible scenarios where it might be removed.
